DETAILED ACTION

1. The amendment filed by applicant on January 9, 2006 is acknowledged and has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lyons et al. (US Patent 5,941,328).

Lyons teaches an electric vehicle including:

- A first controller that controls a motor
- A chargeable battery supplying electric power to the motor
- A second controller connected to the battery that controls electric charge for the battery and electric discharge from the battery
- A first communication path that communicates between the first controller and the second controller
- Each controller including a mutual actuating unit

Note, Figure 2 clearly depicts the function of the command controller and the power controller. The command controller is depicted as "activating" the power controller.

Application/Control Number: 10/680,985 Page 3

Art Unit: 3618

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lyons et al. (US Patent 5,941,328).

Lyons et al. teasches at least one communication path (31, 32, 630, 819, 824, 854).

Lyons et al. is silent regarding whether the path is wired or wireless.

It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to include either a wired path or a wireless path, since applicants has not disclosed that one or the other solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with a wireless path or a wired path.

4. Claims 2, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lyons et al. (US Patent 5,941,328).

Lyons et al. teasches the features described above.

Lyons lacks the teaching of a power source control circuit (with main switches 38, 40) that turns on and off the power source.

Nonobe teaches a power source control circuit.

Based on the teachings of Nonobe, it would have been obvious to one having ordinary skill in the art, at the time the invention was made, to add a power source control circuit to effectively control the driving state of the elements of the power supply system.

Allowable Subject Matter

5. Claims 3-6, 9 and 12-19 are allowed.

Response to Arguments

6. Applicant's arguments filed January 9, 2006 have been fully considered but they are not persuasive. Contrary to applicant's arguments, Figure 2 in Lyons ('328) depicts the power controller (14) being activated by the command controller (50). Column 4, lines 3-9 clearly state that the elements of the power controller "are controlled" by the command controller (50).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/680,985 Page 5

Art Unit: 3618

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication should be directed to Bridget Avery at telephone number 571-272-6691.
